Fax: 843-388-1891

Website: <http://www.adventenv.com>

The objective of this contract is to perform environmental remediation services at sites predominately located at Department of Navy and Marine Corps installations and for other government agencies. ADVENT can perform the following environmental consulting and remediation services under this contract.

Property Acquisition & Divestiture Surveys:

- Environmental Baseline Surveys
- HTRW Surveys
- Environmental Condition Assessments

Installation Restoration

- CERCLA/RCRA Process
- Environmental Site Assessments
- Remedial Investigation and Feasibility Studies
- RFA/RFIs
- Interim and Final Corrective Action Design/Implementation
- Risk Assessments
- O&M Support Information
- Title II Implementation Management/Documentation
- Pilot Testing and Treatability Studies
- Management and Community Relations Plans

UXO and Range Support

- Geophysical Surveys
- UXO Avoidance, Identification & Removal
- Range Containment, Investigation, & Remediation
- Small Arms Range Management & Upgrade Services

Asbestos and Lead-Based Paint Services

- Asbestos/LBP Surveys
- Asbestos/LBP Abatements
- Management Plans

NAICS CODES

- 541330 – Engineering Services
- 541380 – Testing Laboratories
- 541620 – Env Consulting Svcs
- 541710 – R&D in Physical, Eng, & Life Sciences
- 561210 – Facilities Support Svcs
- 562910 – Remediation Services

Air Quality

- Air Emissions Surveys & Testing
- Permit Application & Negotiation
- Compliance Assessments
- Pollution Control Equipment, Evaluation Selection & Installation

Petroleum Storage Tank Programs

- Tank Management Plans
- SPCC Plans
- Integrity Investigations
- Tank Removal & Replacement
- Tank Repairs & Upgrades

Water Quality

- NPDES Permit Applications & Negotiations
- Storm Water Pollution Prevention Plan
- O&M Services
- Treatment Plant Evaluation & Design
- Industrial Wastewater Surveys
- Closure of Treatment Units
- Water Quality Surveys

GIS Database Development and Maintenance

ADVENT ENVIRONMENTAL, INC. EXPERIENCE

Property Acquisition & Divestiture Surveys

- *NAVFAC Atlantic Divison, Norfolk, VA*
ADVENT is conducting environmental baseline surveys of seven remote radar installations on Puerto Rico and throughout the Caribbean.

Installation Restoration

- *Mozel, Inc., St. Louis, Missouri.*
ADVENT provided Title I planning and design services for a comprehensive remediation program at the facility. The corrective action program required design and permitting of a groundwater recovery and treatment system for removal of groundwater from both the surficial and secondary aquifers. The system required the ability for removal and segregation of DNAPL as well as treatment of the collected groundwater prior to discharge. SVE was also necessary for treatment of soil contamination. A cap was designed for construction over the contaminated soil to prevent exposure to site workers as well as to promote more efficient operation of the SVE system.

UXO and Range Support

- *Department of Homeland Security - US Border Patrol Academy, Charleston, SC.*
ADVENT was awarded a contract for remediation of the existing earth backstop and installation of a new granulated rubber bullet containment system on Firing Range 3 located at the US Border Patrol Academy's training facility on the Charleston Naval Weapons Station in Goose Creek, SC. ADVENT was responsible for evaluation of feasible alternatives to accomplish the project objectives. The existing earth backstop was treated for stabilization of lead and used as subgrade for supporting a new bullet containment system. Recoverable quantities of bullet fragments were shipped to an off-site facility for recycling.

Water Quality

- *The Torrington Company, Rutherfordton, North Carolina.*
ADVENT prepared a Storm Water Pollution Prevention Plan (SWP3) for the facility in accordance with conditions of the North Carolina general permit for wastewater discharges associated with industrial activity. During preparation of the plan, ADVENT provided assistance to site personnel in evaluating the applicability of the no exposure exemption for the site.

Air Quality

- *Southern States Phosphate & Fertilizer Company*
ADVENT provided assistance to acid and fertilizer production facilities. ADVENT was responsible for development and oversight of compliance programs and performance of compliance-related issues at the company's manufacturing operations in Savannah, Georgia and Wilmington, North Carolina. ADVENT personnel were responsible for overseeing the administration of the facilities' Title V permits, emissions monitoring, reporting and inspection. ADVENT also was responsible for performance of air emission inventories.

Petroleum Storage Tank Programs

- *Federal Express, Southeast*
ADVENT maintained a contract with Federal Express to evaluate the UST systems for compliance with federal, state and local regulations regarding spill / overfill prevention, secondary containment and leak detection at facilities in Alabama, Arkansas, Florida, Georgia, Oklahoma, North Carolina, Tennessee, and Virginia. ADVENT performed inspections of the installations, recommended modifications to bring the systems into compliance and implemented the recommended activities. ADVENT was responsible for all permitting and reporting associated with the management program for those installations.

Asbestos/Lead Based Paint

- *Naval Facilities Engineering Command – Southern Division, Charleston, SC.*
ADVENT was contracted to remove asbestos from 10 buildings at the Charleston Naval Complex in advance of building demolition. Materials removed included piping insulation, siding, ceiling tiles, floor tiles and mastic.
